NATIONAL AND REGIONAL PLANNING AND DEVELOPMENT IN THE NETHERLANDS: AN ANNOTATED BIBLIOGRAPHY, selected and edited by Dr. Gideon Golany, Department of City & Regional Planning, Cornell University, Ithaca, N. Y. Third edition.

PREFACE

This list covers publications in the English language concerning National, Regional, Town and Rural Planning and Development in the Netherlands.

The papers are classified into 18 principal subject headings. Guide line references are given in many cases to give the reader some idea about the contents of each paper.

Although government and planning authorities in the Netherlands did their best to publish current English material about their development activities, it is still far from satisfying the needs of research students. Moreover, most of this published material is out of date. Analytical and basic material in English is increasingly demanded to follow the major contributions to planning made by the Netherlands.

The first edition of this bibliography was published in 1965 by the Faculty of Comprehensive Planning of the Institute of Social Studies, The Hague, The Netherlands. The paper was prepared for students of the Comprehensive Planning Course, in the Faculty of Comprehensive Planning and fifth year students of Regional Planning in the Faculty of Architecture and Town Planning at the TECHNION-Israel Institute of Technology, Haifa, where I was teaching.

I would like to thank Prof. Jac. P. Thijsse, Chairman of the Faculty of Comprehensive Planning and Mr. Van Schagen, Senior Lecturer for the encouragement and aid given to me in order to publish the paper.

The second edition, including many new entries, was published in 1967 by the Department of City and Regional Planning at Cornell University for the use of the Graduate Students of the seminar in Comparative Regional Planning, which I taught.

This third edition included an updated list in a wider range of subjects.

I wish to thank Mr. G. Menges, the librarian of the Department of City and Regional Planning at Cornell University for his assistance in publishing this edition.

Dr. G. Golany
